At the 12th Sports Activist Awards commendation ceremony attended by President Tsai Ingwen she thanked enterprises for sponsoring and promoting sports, giving high praise to them for their selfless contribution and saying they are important "pushing hands" of sports in Taiwan. The 2020 Sports Activist Awards had an enthusiastic response, attracting 89 entries. 51 units received an award, including 58 in the sponsor category and 20 in the promotion category.

During the event, President Tsai emphasized that making an outstanding athlete doesn't only depend on the hard work, perseverance and passion of the athlete, guidance of coaches, encouragement of friends and family, there is also a lot of unsung support behind the scenes that promotes sport hidden behind the applause. This means that while rewarding outstanding athletes, we should also give applause and thanks to these behind-the-scenes pushing hands. It is hoped that the Sports Activist Awards encourage everyone to be pushing hands behind Taiwan's sports development so that taking part in sports promotion becomes popular, giving sport endless support to jointly build a healthy Taiwan and show the world our pride.

Yang reached the final of the Dusseldorf Judo Grand Slam in February last year but had to

withdraw through injury, still recording his best result and won the silver medal. The silver he bagged in Doha this time will give him more Olympic qualifying points. The rules state that the top 18 judokas on the points table will qualify for the Olympics. At present, Yang and Japan-based female judoka Lien Chen-ling are both on the list.

The CEO of PICKUPS Lee Chen-fan and BiiB co-founder Chen Hsu-yong, two outstanding startups from the 4th training cycle, took part to share related experiences.

In 2018, the Sports Administration commissioned National Chiao Tung University's Center of Industry Accelerator and Patent Strategy (IAPS) and HYPE Sports Innovation (HYPE) to jointly establish SPIN Accelerator Taiwan. Unaffected by the pandemic, they helped the sports startups continue to grow. The 5th demo day was held in English throughout. The 10 participating startup teams in this cycle displayed the rich results of this program through a presentation contest. New Generation Physical Education Classes Going into Nature From Tempering the Body to Tempering the Mind

New Generation Physical Education Classes Going into Nature

Elementary school Physical Education classes are no longer boring. The Sports Administration has developed PE course teaching modules, with situational leading exploratory learning and with experiential methods combined with fun exploratory practice, creative thinking, and reflection action learning giving PE classes more room for imagination.

To allow teachers without PE teaching expertise be empowered and certified, the Sports Administration designed new generation PE course modules that are fun and nurture literacy. This not only overturns the stereotypical image of the public of PE teaching, it also supports the PE teaching professional development of cross-PE areas teachers at elementary schools and, in doing so, increases the PE teaching quality at the elementary school stage.

To date, in all, more than 3,000 PE teachers have participated in the three certification steps of training (study), actual teaching (practice) and reflection workshop (reflection, sharing, and producing) and 1,600 PE teaching module teachers completed the training; also, 180 PE teaching module seed teachers have been set to cities and counties to carry out promotion,

with around 80,000 students experiencing PE teaching module courses.

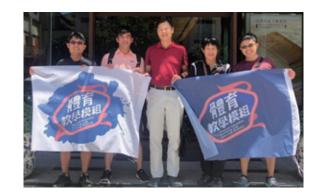

In addition, from 2020, the PE teaching module attempted to develop from the teaching renewal of the individual teacher to the course renewal of the teacher community, reviewing "cross grade"

and "cross class" PE course arranging to design new generation literacy-oriented elementary school courses and teaching.

The Sports Administration began implementing the Mountain Education Promotion and Implementation Plan in 2013. In addition to establishing teachers' mountain climbing skills, schools of senior high school level and below are encouraged to hold mountain wilderness activities; as of 2020, 198 schools have taken part. Taking Guangwu Junior High School as an example, this city school had a low enrolment rate 15 years ago, however, through outdoor activities such as mountain wilderness education, the education structure of the school was gradually flipped and it became one of the star schools of Hsinchu. The reason was that outdoor adventure drives student initiative learning and teachers were also moved. Other schools in remote areas such as Huanan Elementary School and Zhanghu Junior High School also used courses such as outdoor exploration, learning while walking and mountain wilderness survey research to raise school quality and create "education migrants", students flowing back.

These outdoor adventure activities proceed gradually, taking students out of the classroom to explore the basic literacy and abilities related to education courses, nurturing outdoor adventure leadership basic theory, opening up new possibilities with innovative teaching, providing cross-area exchange, making the form of physical activity not only the simple

display of skills such as playing ball or running, by outdoor adventure teaching method and emphasizing imagination in learning, letting the curiosity of adventure guide the physical and spiritual creativity of children, creating endless future possibilities and achieving the aim of making learning fun.

新世代體育課 - 體育課好好玩 走進大自然 - 從身體鍛鍊到心智廳練

國小體育課不再枯燥,教育部體育署研發體育課程教學模組,由情境引導探究學習,以體驗方式結合趣味的探究實作、創意思考、反思行動的學習,讓體育課有更多元的想像。

體育署為協助國小教育階段非體育授課專長教師進行增能與認證,設計出兼具趣味與素養的新世代體

育課程模組,除翻轉社會大眾對體育教學的既有印象外,更支持國小跨體育領域任課教師體育教學專業發展,進而提升國小教育階段體育教學品質。

目前,透過參加培訓研習(學習)、實際教學演練(實踐)及參加反思工作坊(反思分享)三步驟認證, 累積超過 3,000 位體育教師參與,產生 1,600 位體育教學模組教師;另培育 180 位體育教學模組種子教師 至各縣市扎根推廣,大約有 8 萬名學生體驗過體育教學模組課程。

另自 109 年度起,體育教學模組嘗試創造從教師個人的「教學翻新」,發展至教師社群組織的「課程翻新」,重新檢視「跨年級」與「跨班級」的體育課程安排,設計素養導向新世代的國小體育課程與教學。

體育署自 102 年起辦理「山野教育推廣實施計畫」,除建立教師專業登山知能,並鼓勵高級中等以下學校辦理山野活動,109 年已達 198 校共同參與。以光武國中為例,原先為都會型學校,於 15 年前就讀率低,但透過山野教育等多樣戶外活動,逐漸翻轉學校的教育體質,成為新竹市明星學校,因為戶外探索帶動孩子們「主動學習」的心,老師也跟著受到感動;其他諸如華南國小、樟湖國中小等偏鄉學校,因為藉著戶外探索、走讀、山野調查研究等課程,提升辦學品質而創造「教育移民」人口回流。

這些戶外探索活動,循序漸進,帶領學生走出教室,探索教育課程相關之基本素養與能力,培養戶外探索領導的基礎理論,以創新體育教學,開展另一種可能性,提供一個跨領域交流,讓體育活動的型式,不只是打球與跑步等單純運動技能的展現,藉由戶外探索的教學模式,強調學習可以有更多元的想像,讓探索的好奇心引領孩子身體及心靈的創造力,拓展未來的無限可能,更達到「寓教於樂」的目的。
