The UBL Welcomes the New Season: Division 1 Kicks Off on the 25th in Kaohsiung and Pingtung

► The University Baseball League (UBL) welcomes the new season. Division 1 kicks off on the 25th in Kaohsiung and Pingtung.

The 2024 academic year University Baseball League (UBL) officially began with a press conference held on November 19. Deputy Director-General of the Sports Administration (SA), Fang Jui-wen, expressed hopes that through cooperation with the Chinese Taipei University Sports Federation (CTUSF), they can create a high-quality stage for university baseball

players, cultivate more outstanding baseball talents, and increase the visibility of university baseball. The highly anticipated Division 1 games began on November 25 in Kaohsiung, Pingtung, and Taitung. After the preliminary and knockout rounds, the championship will be decided on January 18 and 19, 2025.

The university years are not only crucial for players to hone their skills and strengthen their mental resilience but also serve as an opportunity for all baseball enthusiasts to explore and challenge themselves. This year's theme emphasizes the idea that "focusing on the present means continuously moving forward." Beyond the field, it represents the players' shared experience of facing challenges and seizing each moment to give their best, driving continued progress.

Deputy Director-General Fang emphasized that cultivating sports talents is fundamental to national strength and a critical factor in global competitiveness. Through the UBL, Taiwan's baseball performance has significantly improved, with notable increases in team quality, the number of teams, and the availability of basic baseball fields. To sustain these achievements and further enhance the quality of baseball in Taiwan, the SA will prioritize both "quality and quantity," collaborating with schools, local governments, and private organizations to foster the growth of student baseball.

Players from last year's champions, Chen Ying-rui and Wang Ding-jun, shared their emotions upon winning the title. They emphasized the importance of teamwork and continuous self-improvement during training, which helped them build

competitiveness. They encouraged all student-athletes to prepare themselves so they can shine on the right stage. Female UBL player Wang Hsin-yu, also shared her experience, encouraging more female baseball players to participate by using her own journey as an example.

► Deputy Director-General of the Sports Administration, Fang Jui-wen, expressed the hope that through cooperation with the Chinese Taipei University Sports Federation, they can create a high-quality platform for university baseball players, cultivate more talented baseball players, and increase the visibility of university baseball.

This year, the league has partnered with the Environmental Protection Administration (EPA) for the first time to bring environmental awareness to university campuses, setting a new example of student sports events incorporating environmental sustainability. By emphasizing environmental education, the league

addresses issues such as reducing plastic usage, lowering carbon emissions, and achieving net-zero goals. Reusable ice packs and bands minimize waste, making games eco-friendly and supporting net-zero goals.

This year's league features 94 schools and 120 teams, divided into four categories: Public Division I, Public Division II, General, and Women's League. Division 1 kicked off on November 25, with 16 teams playing in a round-robin format in Kaohsiung, Pingtung, and Taitung. baseball field, where the top 8 teams will compete in a round-robin format. All games in the knockout and finals stages will be streamed live. Fans can follow the action on MOMO TV and SSU TV.

Accessibility Upgraded: Inspection Results for 26 Spectator Sports Venues Released

► Wheelchair seating experience for spectators (photo taken by the program implementation team).

With the growing popularity of sports and the increasing construction of competition venues, the Sports Administration (SA) is committed to enhancing accessibility in sports facilities, ensuring individuals with impairments can fully enjoy the excitement of live competitions. To evaluate the accessibility of spectator sports venues nationwide, the SA commis-

sioned National Taiwan Normal University to implement the "2023-2024 Program for Creating a Friendly Sports Environment for Special Needs Groups." The project inspected 26 major venues hosting professional baseball, basketball, and volleyball games, aiming to improve convenience and ensure facilities meet the needs of people with impairments.

The two-year site inspections covered major sports venues across Taiwan, including large facilities like Rakuten Taoyuan Baseball Stadium, Kaohsiung Arena, and Taipei Gymnasium, as well as basketball courts and baseball fields. The inspections assessed accessible features such as barrier-free entrances, accessible parking spaces, wheelchair seating (with companion seating), escalators, and accessible restrooms. They also evaluated signage clarity, aisle widths, and the availability of assistive devices for various types of impairments, ensuring the venues comply with standards and meet users' practical needs.

The findings highlighted significant improvements in the overall accessibility of sports venues, driven by the efforts of local governments and increasing awareness of sports equity. Notable examples include the wheelchair and special needs seating at Kaohsiung Arena, accessible ticketing and restroom facilities, employee-friendly services, and the implementation of guide paths. Taipei Heping Basketball Gym stood out for its accessible ticketing entrances, clear parking lot signage, and efficient elevator flow design. Tainan Municipal Baseball Stadium also impressed with its well-designed dining areas. These venues exemplify outstanding accessible facility design.

► Accessible entrance example for people with impairments (Taipei Heping Basketball Gym).

The SA emphasized that a key aspect of this inspection was the involvement of domestic impairment groups, experts, and athletes with various impairments, who provided practical feedback on the accessibility and usability of sports venue facilities. Their input highlighted areas needing improvement in facility distribution, convenience, and maintenance management. While most venues offered basic accessible facilities, issues remained in layout, details, and upkeep. For example, some wheelchair seating areas were occupied by non-disabled individuals, accessible pathways were obstructed, and certain aisles experienced water accumulation.

Additionally, although some facilities met regulatory standards, poor maintenance impacted usability, such as malfunctioning automatic flushing systems in accessible restrooms and unstable handrails.

The inspection revealed that 13 of the 26 baseball venues still faced issues such as the absence of accessible pathways, a lack of guide facilities for the visually impaired, insufficient seating for wheelchair users, and other related shortcomings. The remaining 13 comprehensive venues displayed common deficiencies, including a shortage of accessible restrooms, inadequate wheelchair seating, and insufficient accessible parking spaces for motorcycles.

The results of this inspection will be published on the SA's official website, providing a valuable reference for local governments to enhance their planning of accessible facilities. Moving forward, the government will continue promoting the optimization of accessibility in spectator sports venues through public construction projects. The goal is to ensure that accessibility considerations are seamlessly integrated into the design and management of sports venues by local governments. By fostering a fully accessible sports environment, the initiative aims to allow everyone—whether participants or spectators—to experience the excitement and emotional connection of sports competitions without barriers.

友善再升級

26 座觀賞性競賽運動場館無障礙設施現勘結果出爐

隨著體育活動熱絡及競賽場館普及，教育部體育署致力推動運動場館無障礙設施建置，讓身心障礙者能充分享受競賽觀賞的樂趣。為瞭解國內觀賞性競賽運動場館無障礙設施現況，體育署委託國立臺灣師範大學執行「112-113 年營造特需族群友善運動環境」專案計畫，針對 26 座我國職業棒球、籃球賽事及排球聯賽主要場館，進行觀賞性競賽運動場館無障礙設施現地勘查，提升無障礙設施便利性，以確保符合身心障礙者權益。

本次實勘歷程耗時 2 年，26 座場地的現勘遍及全國主要競賽運動場館，包括樂天桃園棒球場、高雄巨蛋及臺北體育館等大型體育場、籃球館及棒球場等地點，勘查重點包括無障礙出入口、無障礙停車位、輪椅專用座位（含陪同席）、手扶電梯及無障礙廁所等設施。此外，針對場館內指引標示是否清晰、通道是否足夠寬敞及有無提供不同障別輔助設備亦進行全面性檢核，檢視各類無障礙設施符合標準，滿足使用者實際需求。

隨著運動平權觀念推展及各縣市政府努力下，本次勘查發現在整體無障礙設施設計方面，友善性大幅升級，優良範例：如高雄巨蛋的輪椅觀眾席、特殊需求觀眾席設置、購票出入口、無障礙廁所、員工友善服務及人導法等。臺北和平籃球館則在購票出入口、停車場無障礙標示及電梯動線上表現出色。臺南市立棒球場用餐區配置優良等，皆為無障礙設施優良示範點。

體育署表示，本次實勘最大的特點是透過國內身心障礙者團體、專家學者及不同障別愛好運動者親身的實際觀賞體驗，針對運動場館中無障礙設施設備、動線規劃友善化的可接受性、可近性及可用性，提供具體的調整改善意見。勘查結果發現，大部分場館均具基本無障礙設施，但在設施分布、細節便利性及維護管理上仍有改善空間。進一步再透過訪談場館管理者及現場觀察，則有部分場館輪椅觀眾席遭占用、無障礙通道設置機踏車路阻及通道積水等維護管理缺失情形，另部分設施設置雖符合

法規，仍有因維護不良而影響使用的狀況，如無障礙廁所感應式沖水設施未通電或扶手不穩定等。

待改善方面，勘查的 13 座棒球場中，部分仍存無障礙通道及視障者引導設施不足、輪椅觀眾席不足及相關缺失等問題；其他 13 座綜合型場館，則多偏向無障礙廁所、視障者引導設施、輪椅觀眾席及無障礙機車停車位不足等缺失。

本案實勘結果後續將公布於體育署官網上，提供受勘查場館所轄地方政府優化無障礙設施規劃的參考依據，未來亦將藉由執行公共建設計畫加強推動觀賞性競賽運動場館無障礙設施優化，持續輔導地方政府辦理運動場館空間規劃及營運管理時，將無障礙友善納入整體考量，期望藉由完善運動場館無障礙環境，不管是參與運動或是觀賞運動賽事，每一顆愛運動的心，都能無障礙的參與，享受到競賽的歡樂與感動。
